
PCI hospitals provide percutaneous coronary intervention (PCI) either on a continuous (24 hours a day/7 days per week) or non-continuous basis. Non-PCI sites (NPCI) are not capable of PCI however have a STEMI protocol for administration of thrombolytics and/or rapid transfer protocol to PCI facility.

MAP KEY

- Not PCI
- PCI (24/7)
- PCI (not 24/7)
- Within a 30 min drive to a PCI hospital
- Within a 60 min drive to a PCI hospital
- STEMI Regions
- Counties

Note: This map may not include all hospitals outside of Arkansas with PCI capability. The data was self-reported by hospitals and hospital status may change over time.
