You **DO NOT** have to register for the training or the exam.

Notes are not allowed to use during exam. Formula and relevant specification sheets will be provided.

https://healthy.arkansas.gov/programs-services/public-health-safety/onsite-wastewater/

If inclement weather (snow or ice) is a possibility, call Cole Kitchens at 501-837-4095 the morning of the exam to determine test status.

The exam consists of four parts:

Part 1: Rules section ─ 50 multiple-choice questions chosen from the information in the Arkansas *Rules Pertaining to Onsite Wastewater Systems* and Act 402 of 1977.

Part 2: Math section ─ 20 multiple-choice questions. A formula sheet is included in this packet.

Part 3: Electrical section ─ It requires the applicant to wire a control panel, demonstrate the ability to determine correct wire sizes, and select an appropriate pump using a pump curve. (Diagrams and wire sizing charts provided)

Part 4: Field section ─ The applicant must record rod readings/elevations and determine if maximum storage of effluent can be achieved. A tenths grade rod and a laser level are provided.
