

Regulatory/Discipline

The Arkansas State Medical Board's mission is to protect the health, safety, and welfare of the people of the State of Arkansas with the goal that all citizens are provided with the highest quality health care. The Medical Board receives and reviews complaints against each type of medical profession it licenses. All complaints received are reviewed by the Medical Board to determine if there have been any violations of the Medical Practices Act. If the Medical Board determines that violations have occurred, disciplinary actions are taken.
