

COVID-19 Vaccines

Guidance on Masking After Full Vaccination

If you have been fully vaccinated:

- You can **gather indoors with fully vaccinated people** without wearing a mask.
- You can **gather indoors with unvaccinated people from one other household** without wearing a mask, unless any of those people or anyone they live with is at risk for severe illness from COVID-19. For example, grandparents may visit their grandchildren.
- Monitor yourself for the **symptoms of COVID-19**. Get tested and stay away from others if you develop symptoms.

These precautions still apply:

- **Wear a mask, maintain social distancing** and **avoid crowds or poorly ventilated spaces** when you:
 - Are in public
 - Gather with unvaccinated people from more than one other household
 - Visit an unvaccinated person who is at increased risk of severe illness from COVID-19 or who lives with a person at increased risk

What does fully vaccinated mean?

- 2 weeks after your second dose in a 2-dose series, like the Pfizer or Moderna vaccines
- 2 weeks after a single-dose vaccine, like Johnson & Johnson's Janssen vaccine
