

ADVANCED Stroke Life Support®

updated: April 2026

Advanced Stroke Life Support® Blended Learning Course will educate healthcare professionals to identify, evaluate, and manage patients with stroke. This ASLS® Course was co-developed by the American Heart Association and the University of Miami's Gordon Center for Simulation and Innovation in Medical Education and is appropriate for all healthcare providers involved in the management of acute stroke patients. There are three tracks available for students to learn how to assess and manage stroke emergencies: prehospital, in-hospital, and a third track that covers both settings.
