BOARD ACTION

Dr. Richmond made the motion in the matter of **Carl Collier, PD05206, Case #2026-038**, the Board finds Allegations A1 – A10 are true, and Charges C1 – C3 being proven, and recommends that Mr. Collier be asked to complete and/or document what has been done in terms of a root cause analysis to identify the errors that occurred in this case and in a comprehensive way. Reduce that to writing, including how you are going to go about making sure that not only in your own personal practice, but in the pharmacy that you are working, that the procedures are being followed. That there be 10 hours of continued education, that would be outside of the CE required for your biennial pharmacist renewal, in the areas of immunization protocols and medical errors. That we assess an administrative fee to cover investigation costs of $1,000 and this be non-disciplinary. As part of the root cause analysis, I would ask that you go back, and in an exhaustive fashion, going back through the records you've already looked

at, with profile, with prescription, using the health insurance card, any potential source of follow-up, to see if you can identify who this patient is, just because of the potential for effect on the fetus, and document that in your reporting back to the Board as part of your root cause analysis, and notify the patient.
