

ARKANSAS DEPARTMENT OF HEALTH STROKE AWARDS

PERIOD OF PERFORMANCE: JULY 2023 – JUNE 2024

Awards will be announced to hospitals, EMS services and Arkansas geographic regions **November 2024**. Data will be sourced from the AR Stroke Registry and EMS Registry.

HOSPITAL

- Stroke Band Award - Given to the small, medium, and large hospital with the highest percentage of documentation of stroke band identification number, based on percentiles.
- Door to CT - Given to the small, medium, and large hospitals with the lowest average door to CT times, filtered to include only patients presenting with last known well time within 24 hours of arrival, based on percentiles.
- CDC Defect-Free Care – To qualify for this award, a hospital must be designated through ADH or a national accreditation body. The top performing hospitals within each category of small, medium, and large, based on percentiles, will receive the Defect-Free Care award.

	Small Bed size	Medium Bed size	Large Bed size
AR Stroke Registry			
Stroke Band Award	X	X	X
Door to CT Award	X	X	X
CDC Defect-Free Care Award	X	X	X

*A small size hospital is defined as 0-50 beds; medium size is 51-150 beds and large is greater than 150 beds. NOTE: A minimum of 5 patients must be seen within the period of performance to qualify for an award.

EMS AGENCY

- Stroke Band Award - Given to the low-medium volume, and high-volume EMS agency with the highest percentage of documentation of stroke band identification numbers for suspected stroke cases, based on percentiles.
- Pre-notification - Given to the low-medium volume, and high-volume EMS agency with the highest percentage of documentation of pre-notification, based on percentiles. This will be determined based on data in the AR Stroke Registry for the pre-notification data field and hospital identification of the EMS agencies meeting this level of performance.

Pre-Notification Award	Region with the Highest % Documentation
Stroke Band Award	Region with the Highest % Documentation
Door to CT Award	Region with the Lowest Average Door to CT time (min)

*Regions are defined as one of the seven geographical regions of Arkansas including: AR Valley, Central, Northwest, North Central, Northeast, Southwest and Southeast.

TRANSITION OF CARE

- This award is available to be received by up to three healthcare organizations or individuals involved with stroke patient transition of care (including community paramedics, nurses, physicians, etc.) This recognition will honor the awardee for the exceptional work they did with stroke patients and/or their families as part of the transition of care for the patient. Nominations will be accepted via survey to include the reason for the nomination and justification, and a review team will decide who is to receive the award.
