VFC ELIGIBILITY AND FUNDING SOURCES

User Defined Table 0064 – Financial Class-Vaccines for Children

WebIZ supports the following VFC Relationship codes. Use in PV1-20 for patient VFC Eligibility and in OBX-5 for VFC Eligibility at the dose administered level (i.e., vaccine). The IIS prevents both vaccine- and patient-level financial eligibility from being set for patients who are not eligible for those categories based on their age. These are the recommended values from the CDC per the http://www.cdc.gov/vaccines/programs/iis/technical-guidance/downloads/hl7guide-addendum-7-2015.pdf

- Note: V06 and V07 have been deprecated and will not be supported after August 15, 2016. These codes are essential for future automatic vaccine inventory dose decrementing with HL7.

Value Set Name – Immunization Funding Source

The Immunization Information System supports the Immunization Funding Source codes listed in Table 9-19. Use in OBX-5 when OBX-3 has a value of 30963-3. The Immunization Information System will insert the data on the vaccination edit screen under funding source for the associated vaccine. Please note, these are the recommended values from the CDC per http://www.cdc.gov/vaccines/programs/iis/technical-guidance/downloads/hl7guide-addendum-7-2015.pdf
