<input type="radio"/> Yes <input type="radio"/> No <input type="radio"/> N/A or don't know		

Facility Type (select one):

- Private Facility (privately funded entity; non-governmental)
- Public Facility (publicly funded or government entity)
- Combination (funded with public and private funds)

Is this facility a mobile facility, or does this facility have mobile units? *

- Yes
- No

*A mobile unit is a dedicated vehicle with a primary purpose of providing medical services (e.g., immunization services).

VACCINES OFFERED

Is this provider a specialty provider? * Please note: the Immunization Program must review and approve any provider who identifies as a specialty provider.

- Yes
- No

VFC Vaccines Offered (Select One):

- All VFC ACIP-recommended routine vaccines for children 0 through 18 years of age
- Select vaccines only (This option is available only for facilities designated as Specialty Providers by the Immunization Program)

*A "Specialty Provider" is defined as a provider that only serves (1) a defined population due to the practice specialty (e.g., OB/GYN, STD, family planning, etc.) or (2) a specific age group within the general population of children ages 0–18. Local health departments and pediatricians are not considered specialty providers. The Immunization Program has the authority to designate VFC providers as specialty providers. At the discretion of the Immunization Program, certain enrolled providers such as pharmacies or community vaccinators may offer a limited selection of vaccines.

| <input type="radio"/> Influenza | <input type="radio"/> RSV monoclonal antibody products | |

PROVIDER POPULATION

Provider population based on patients seen during the previous 12 months. Report the number of children by age group who received vaccinations at your facility. Count a child only once based on the age/eligibility categories at the last immunization visit, regardless of the number of visits made. The following table details the number of children who received VFC vaccine and non-VFC vaccine, by eligibility category.

VFC Vaccine Eligibility Categories	# of children by age category who received VFC vaccine			
	<1 Year	1–6 Years	7–18 Years	Total
Enrolled in Medicaid				
No health insurance				
American Indian/Alaska Native				
Underinsured in FQHC/RHC or deputized facility ¹				
Total VFC:				
Non-VFC Vaccine Eligibility Categories Planning to Vaccinate	# of children by age category who received VFC vaccine			
	<1 Year	1–6 Years	7–18 Years	Total
Insured (private pay/health insurance covers vaccines)				
Other underinsured patients ²				
Patients covered by Children’s Health Insurance Program (CHIP) ³				
Total Non-VFC:				
Total Patients (must equal sum of Total VFC + Total Non-VFC Patients Planning to Vaccinate):				

¹ Underinsured includes a child that is 18 years or younger who has health insurance, but the insurance does not cover any Advisory Committee on Immunization Practices (ACIP) recommended vaccines; a child whose insurance covers only selected ACIP-recommended vaccines; or a child whose insurance does not provide first-dollar coverage for vaccines—first-dollar coverage includes copays, coinsurance, or deductibles. This means that copays, coinsurance, or deductibles will not apply for the administration of any ACIP-recommended vaccines purchased using VFC funding. This applies only to the cost of the vaccine not to any administration fee or office visit fee (which may have a separate co-pay or co-insurance). Children who are underinsured for selected vaccines are VFC eligible for non-covered vaccines when served at a Federally Qualified Health Center (FQHC) or Rural Health Clinic (RHC) or other site with an approved deputization agreement. The deputized site must have a written agreement with an FQHC/RHC and the state/local/territorial immunization program in order to vaccinate underinsured children.

²*Other underinsured* are children that are underinsured but are not eligible to receive federal vaccine through the VFC program because the provider or facility is not a FQHC/RHC or a deputized provider. However, these children may be served if vaccines are provided by the state program to cover these non-VFC eligible children.

³CHIP – Children enrolled in the state Children’s Health Insurance Program (CHIP). Children enrolled in CHIP are considered insured and are not eligible for vaccines through the VFC program. Each state determines how CHIP vaccine is purchased and administered by participating providers.

TYPE OF DATA USED TO DETERMINE PROVIDER POPULATION (choose all that apply)

- Benchmarking
- Medicaid claims data
- IIS
- Other (must describe):
- Doses administered
- Provider encounter data
- Billing system

Provider Type Definitions

Behavioral Health Clinic

Locations that provide counseling, behavioral therapy, medication, case management, and other types of services to persons with behavioral health disorders. This provider type is used for behavioral health treatment centers where on-site vaccination services are provided.

Birthing Hospital/Facility

Birthing facility/hospital: a hospital with >1 birth within the past year (January 1 - December 31) OR at least one registered maternity bed.

Community Vaccinator

Community-wide vaccinators that are external to public or private conventional healthcare providers, offer vaccination services only, and conduct vaccination clinics in mobile, temporary, or offsite locations exclusively (e.g., non-permanent school-located vaccination clinics).

Correctional Facility

Juvenile correctional facilities as well as adult correctional facilities where juveniles are confined, and on-site vaccination services are provided. Unlike juvenile detention centers, confinement in correctional facilities is generally long-term in nature; youths are confined in secure correctional facilities for periods generally ranging from a few months to years.

Family Planning Clinic (non-health department)

Clinic that provides contraceptive services for clients who want to prevent pregnancy and/or space births, pregnancy testing and counseling, assistance to achieve pregnancy, basic infertility services, STD services (including HIV/AIDS), and other preconception health services (e.g., screening for obesity, smoking, and/or mental health). This provider type is used for family planning clinics where vaccination services are provided. *NOTE: Non-health department clinics that offer only STD/HIV screening and treatment services should be categorized as “STD/HIV Clinic (non-health department).”*

Federally Qualified Health Center

Community-based health care providers that offer primary care services in underserved areas and meet the criteria for “Federally Qualified Health Center (FQHC)” certification as set by the Centers for Medicare and Medicaid Services (CMS) (Section 1861(aa)(4)(B) and section 1905(l)(2)(B) of the Social Security Act). FQHCs include [HRSA Health Center Program](#) award recipients and HRSA Health Center Program look-alikes, which are health centers that meet Health Center Program requirements but do not receive federal award funding. *NOTE: Certain tribal organizations are also FQHCs. However, for tribal or urban Indian health clinics enrolled as FQHCs, use the “Indian Health Service, Tribal, or Urban Clinic” designation. The FQHC provider type includes any satellite, temporary, or offsite locations where the provider of record (i.e., FQHC personnel) is administering vaccine.*

Hospital

All hospitals, including medical school or university-affiliated hospitals but excluding birthing hospitals, where on-site vaccination services are provided. *NOTE: For birthing hospitals, use the “Birthing Hospital or Birthing Center” designation. The Hospital provider type includes any temporary, mobile, off-site, or satellite locations where the provider of record (i.e., hospital or hospital-contracted personnel) is administering vaccine.*

Indian Health Service, Tribal, or Urban Clinic

Indian Health Service (IHS), Tribal, or Urban Indian Health Program facilities that provide vaccination services. Urban Indian Health Centers are also designated Federally Qualified Health Centers and provide comprehensive primary care and related services to American Indians and Alaska Natives. Alaska Village Clinics should be included in this provider type.

Juvenile Detention Center

Juvenile detention centers where on-site vaccination services are provided. Juvenile detention is defined as the temporary and safe custody of juveniles who are accused of conduct subject to the jurisdiction of the court who require a short-term

restricted environment for their own or the community's protection while pending legal action or dispositional placement in a correctional facility.

Migrant Health Center

Centers that provide health services, including on-site vaccination services, to migratory and seasonal agricultural workers and their families.

Mobile Provider

Providers who offer vaccination as well as other healthcare services exclusively out of a mobile facility. This designation should NOT be used for providers who have a mobile unit associated with their facility, but the unit is not the primary location for vaccine storage and administration.

Pharmacy

Stand-alone retail pharmacy (e.g., CVS, Duane Reade, Walgreens, independently owned pharmacies, etc.) or retail pharmacy within a hospital or health system where on-site vaccination services are provided. This category also includes retail pharmacies that conduct community vaccination clinics at offsite or mobile locations. *NOTE: This provider type does not include retail health clinics (e.g., Minute Clinic) or centralized pharmacies within a hospital or healthcare facility that dispense vaccines to be administered by facility staff. In those cases, the provider type is determined by who administers the vaccine. The Pharmacy provider type includes any temporary, mobile, off-site, or satellite locations where the provider of record (i.e., pharmacy personnel) is administering vaccine.*

Private Practice (e.g., family practice, pediatric, primary care)

Private practice locations, including solo, group, or HMO practitioners, where vaccination services are provided. *NOTE: Includes any temporary, mobile, off-site, or satellite locations where the provider of record (i.e., provider location personnel) is administering vaccine.*

Private Practice (e.g., family practice, pediatric, primary care) as agent for FQHC/RHC-deputized

A deputized provider has been delegated by a Federally Qualified Health Center (FQHC) or a Rural Health Clinic (RHC) as an agent to vaccinate underinsured children. This provider type is used for deputized private practices, including solo, group, or HMO practitioners, that provide vaccination services. *NOTE: Includes any temporary, mobile, off-site, or satellite locations where the provider of record (i.e., deputized private practice personnel) is administering vaccine.*

Public Health Clinic (state/local)

State or local public health clinics that provide vaccination services. This category includes public health -run STD/HIV clinics, family planning clinics, and teen health centers. *NOTE: Includes any temporary, mobile, off-site, or satellite locations where the provider of record (i.e., public health clinic personnel) is administering vaccine.*

Public Health Clinic (state/local) as agent for FQHC/RHC-deputized

A deputized provider has been delegated by a Federally Qualified Health Center (FQHC) or a Rural Health Clinic (RHC) as an agent to vaccinate underinsured children. This provider type is used for deputized state or local public health clinics that provide vaccination services. *NOTE: Includes any temporary, mobile, off-site, or satellite locations where the provider of record (i.e., deputized public health clinic personnel) is administering vaccine.*

Refugee Health Clinic

Clinics that are designated to improve the health care and monitor medical conditions of refugees who have relocated to the United States. This provider type is used for refugee health clinics that provide vaccination services. *NOTE: If vaccination services are provided in a location that is co-located in a physical facility with a refugee health clinic but are not administered by refugee health staff, select the category of the provider with oversight of vaccination services.*

Residential/Congregate Care Facility

Out-of-home settings, including group homes, childcare institutions, congregate foster care facilities, where onsite vaccination services are provided. *NOTE: If children in these settings receive vaccinations from a mobile provider or community vaccinator, then that provider type should be used.*

Retail Health Clinic

Health clinics located within grocery, drug, or retail stores that provide onsite vaccination services. Retail health clinics generally provide a focused range of protocol-driven healthcare services, such as the treatment of minor illnesses or injuries and vaccination services (e.g., Minute Clinic, Take Care Clinic).

Rural Health Clinic

Clinics located in a non-urbanized Health Professional Shortage Area, Medically Underserved Area, or governor-designated and secretary-certified shortage area. This provider type is used for rural health clinics that provide vaccination services.

School-Based Clinic (permanent clinic location)

Permanent school-based clinics that provide vaccination services through 12th grade. *NOTE: For non-permanent school-based clinics, use the “Community Vaccinator” designation. The School-Based Clinic (permanent clinic location) provider type includes any temporary, mobile, off-site, or satellite locations where the provider of record (i.e., school-based clinic personnel) is administering vaccine.*

STD/HIV Clinic (non-health department)

Clinics that provide timely STD/HIV diagnosis, testing with on-site treatment, and partner services. This provider type is used for STD/HIV clinics NOT located within a health department where on-site vaccination services are provided. *NOTE: this category should be used by non-HD clinics that exclusively offer STD/HIV screening and treatment services.*

Student Health Services

Permanent school-based clinics that provide vaccination services for college/university students (e.g., Job Corps).

Teen Health Center (non-health department)

Teen health centers that are NOT public health department-sponsored and provide on-site vaccination services.

Urgent/Immediate Care Center

Locations that provide immediate medical outpatient care for the treatment of acute and chronic illness and injury. This provider type should be used for urgent care centers or walk-in clinics where on-site vaccination services are provided.

Women, Infants, and Children (WIC) Clinic

Locations that serve low-income pregnant, postpartum, and breastfeeding women, infants, and children up to age 5 years who are at nutritional risk by providing nutritious foods to supplement diets, information on healthy eating including breastfeeding promotion and support, and referrals to health care. This provider type is used for WIC clinics that also provide vaccination services. *NOTE: If vaccination services are provided in a location that is co-located in a physical facility with a WIC clinic but are not administered by WIC staff, select the category of the provider with oversight of vaccination services.*

Other

Any provider type not captured in one of the other provider type options.

Provider Specialties Definitions**Family Medicine**

Manages common illnesses and conditions for people of all ages, focusing on overall health and well-being throughout the lifespan.

Internal Medicine

Deals with the prevention, diagnosis, and nonsurgical treatment of diseases and disorders of the internal organs/structures in adults.

OB/GYN

Obstetrician-gynecologist. Provides specialized services in women's health.

Pediatrics

Involves disease/disorder prevention, diagnosis, and treatment associated with the physical and developmental health of children from birth to young adulthood.

Preventive Medicine

Focuses on the health of individuals and communities with the goal of promoting health and well-being and preventing disease, disability, and death.
